JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

caught it near the southern end of Monterey Bay, California; it is deposited in the fish collection of the Museum of Zoology, of the University of Michigan.

2. The food of *Sebastodes auriculatus* Girard.

The stomach contents of a box of this species, caught over a sand-shell bottom about twenty meters deep, off Pizmo Beach, California, upon examination were found to consist of: two young rays (*Raja bimaculata*); one example of *Otophidium taylori*, and remains of other fishes; many shrimps, and three species of crabs; one clam (*Siliqua*), and a small starfish.

CARL L. HUBBS,
University of Michigan.

RECORDS OF PACIFIC FISHES

A pearl fish, *Fierasfer dubius* Putnam, encrusted in mother of pearl, was brought into San Diego lately from a point "150 miles southwest of Point Loma." A head fish, *Mola mola*, was lately taken off the Island of Kauai, the first record from the Hawaiian Islands.

DAVID STARR JORDAN,
Stanford University, Calif.
